

## KEIRTON PROJECT

CONSTRUCTION: PRE-ENGINEERED STEEL BUILDING  
LOCATION: FERNDALE, WASHINGTON

The Keirton project, completed in June 2021, is a 50,000 sq. ft. pre-engineered steel building for manufacturing agricultural equipment. Complete with 4 loading docks, 8 overhead doors, and 6,000 sq. ft. of office space.

### STRENGTH OF STEEL FRAMING

A pre-engineered steel building delivers a powerful combination of speed, strength, and cost efficiency — making it one of the most reliable and future ready construction methods available today.

### CREDO EXPERTISE

We have deep experience in designing and delivering high performance pre-engineered steel buildings, combining precision engineering with efficient project execution to create durable structures built to last.

### COST-EFFECTIVE & FAST TO BUILD

Lower long-term design, build, and construction costs translate to predictable pricing and efficient development costs.
